Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-34 are drawn to verification of identification information classified in class 705 subclass 75.
 - II. Claims 35-46,55 are drawn to health care management operations, classified in class 705 subclass 2.
 - III. Claims 47-54 are drawn to medical diagnostic testing, classified in class 660 subclass 300.

The inventions are distinct, each from the other because of the following reasons:

2.

Inventions I , II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed such as a transport agent and medical device interface. The subcombinations have separate utility such as an agent that automates the procedure and specialized communication interfaces..

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
